PROFILE

A detail-oriented PHP Developer with 5 years of experience building dynamic and responsive web applications. Proficient in PHP frameworks like Laravel, Symfony, and CodeIgniter. Skilled in integrating third-party APIs, optimizing application performance, and maintaining robust backend architectures. Strong collaboration skills and a proven track record of delivering high-quality solutions in agile environments.

Very well experienced in Core Development, Database Management, Frameworks and Libraries, API Integration, Performance Optimization, Testing and Quality Assurance. Working closely with DevOps teams to streamline CI/CD pipelines for PHP applications.

EXPERIENCE

Auxesys Systems Pvt. Ltd *JAN 21- MAR 23*
PHP Developer

- Designed and developed scalable web applications in PHP, implementing core functionalities like authentication, role-based access control, and RESTful APIs.
- Optimized MySQL databases by designing efficient schemas and implementing indexing strategies to enhance query performance.
- Automated deployment workflows using Docker and Jenkins, minimizing errors and improving deployment efficiency.
- Collaborated with front-end developers to seamlessly integrate React-based user interfaces with PHP back-end services.
- Created custom PHP-based admin dashboards to enhance client data management and reporting processes.

CodeBridge Solutions *SEPT 18 - DEC 21*
Junior PHP Developer

- Write clean, maintainable, and efficient PHP code following industry best practices. Collaborate with senior developers to implement features and functionalities in web applications.

SKILLS

Programming Languages:

PHP (Expert)
Python (Intermediate)
JavaScript (Intermediate)
HTML5 (Intermediate)
CSS3 (Intermediate)
SQL (Intermediate)
Bash (Basic)

Frameworks/Libraries:

Laravel (Expert)
Codeigniter (Intermediate)
Symfony (Basic)
React (Basic)
Bootstrap (Basic)
jQuery (Basic)
Node.js (Basic)

Databases & ORMs:

MySQL (Advanced)
PostgreSQL (Advanced)
PHP ORM (Advanced)
MongoDB (Intermediate)
SQLAlchemy (Intermediate)

Tools & Platforms:

Git (Expert)
Docker (Intermediate)
Jenkins (Intermediate)
Linux (Intermediate)
AWS (Basic)
Heroku (Basic)

PROJECTS

Real-Time Chat Application

A real-time chat application where users can create rooms, send and receive messages instantly, and see the presence status of others. It could include features like direct messaging, file sharing, and notifications.

- Integrate third-party APIs and develop RESTful APIs for application enhancements. Troubleshoot and debug application issues to ensure optimal performance and functionality.
- Participate in code reviews to improve code quality and share knowledge within the team. Assist in database management, including designing, querying, and optimizing MySQL databases.
- Ensure seamless integration between server-side and client-side applications.
- Set up and manage deployment pipelines using Git.

EDUCATION

 **Equinim College of Technology** Nov 2024
Perth - Australia

ICT50220 Diploma of Information Technology

- Specializing in Web Development, Data Analysis and Machine Learning
- Deployment and Hosting
- Privacy and Security
- Working with Clients and Industry

 **Indian Institute Of Skill** OCT 2018
Development Training

DCS/Q0001 Diploma of Computer Science

- Programming and Software Development
- Data Structures and Algorithms
- Database Management Systems (DBMS)
- Web development, along with software testing & debugging
- Networking and Communication
- Ethics and Professional Practices

CERTIFICATION

- DataAnalysis Using Python from **IBM**
- PHP (Laravel) Full Stack Web Developer Bootcamp from **Udemy**
- The Complete 2024 Web Development Bootcamp from **Udemy**
(Full-Stack Web Developer: PHP, HTML, CSS, JavaScript, Node, React, PostgreSQL, Web3 and DApps)

Problem Solved:

This app allows teams or individuals to communicate efficiently, enhancing collaboration and interaction without using third-party services.

Technologies Used:

HTML5, CSS3, JavaScript, React (for dynamic UI), MySQL, Git

Authentication: Laravel's built-in authentication system

Real-Time Communication:

WebSockets using Laravel Echo and Pusher

File Uploads: Handled file uploads using Laravel's file storage system

Deployment: AWS (EC2, RDS, S3), Docker for containerization

PHP E-Commerce Website

e-commerce platform developed using PHP, designed for managing products, orders, and user accounts. It includes essential features like a shopping cart, secure checkout, product search, and an admin panel for managing inventory and customer orders.

Technologies Used:

HTML5, CSS3, JavaScript (to enhance interactivity used AJAX-based dynamic content loading) , Bootstrap, PHP, Laravel, MySQL

Authentication: Built-in PHP Sessions, Password Hashing (bcrypt), CSRF Tokens, Prepared Statements (PDO)

APIs and Integrations: Payment Gateway, Shipping API.

File Management: Laravel's storage functionality

Deployment: Deployed on a Linux server with Nginx. Git for code management.
